[170407 2017 SW Request Compiled.pdf](#)  
[EPA Approval 2017 SurfaceWater\\_04.24.17.pdf](#)

Dear Mr. Brown:

EPA has completed its review of the April 7, 2017 ARC request for authorization to implement the proposed 2017 Surface Water Monitoring Program; Leviathan Mine Alpine County, California. This work was submitted to EPA pursuant to Administrative Order for Remedial Investigation and Feasibility Study, Leviathan Mine, Alpine County, California (CERCLA Docket No. 2008-18, June 23, 2008).

EPA conditionally approves and directs ARC to commence with the 2017 surface water sampling.

ARC should provide preliminary sampling results and assessment of surface water data within 90 days of completion of the field sampling along with an assessment of the need for any additional data or sample collection during this very wet season. EPA may recommend additional sampling pending the results of those samples and/or to fill additional data gaps.

ARC shall include and assess all 2017 surfacewater data collected (including the additional sampling that EPA requests herein), in the Surfacewater Characterization chapter of the Site Characterization report due to EPA on December 31, 2017. Presentation of the data should also assess whether additional surface water sampling is recommended.

EPA appreciates Atlantic Richfield's efforts to begin the 2017 Surface Water Monitoring Program as early as possible during this very wet season.
